

IsoMax

Sound Isolation Clips

Low Cost, Space Saving Walls and Ceilings

Achieve double stud wall noise control performance in less space at a lower cost for less money or ensure a ceiling will achieve the performance resilient channel claims.

IsoMax clip resiliently secures common drywall furring channel. Offering significantly higher STC values than drywall attached to resilient channel, IsoMax ensures that installers will not inadvertently screw through the “resilient” leg of the channel into the joist or stud.

The IsoMax Advantage

- Low cost for high performance
- Flexible “snap-on” clips install quickly, no pinching channel and allows for height adjustments during installation of channel
- Error free installation of standard drywall furring channel. Eliminates accidental short circuiting common with resilient channel
- Easiest method for STC 55+ stud wall assemblies
- Can easily accommodate furring channel widths from 2.38" - 2.75"
- UL L583 is a fire rated assembly for engineered joists, parallel chord trusses, and wood joists.
